

OIL SAND PROCESSING

**Tungsten Carbide
Wear Experts**

Good Earth Tools Carbide Protects Oil Sand Processing Equipment!

Oil sand mining and processing creates a harsh and difficult environment for equipment. Wear from erosion, high impact, and corrosion is typically extreme and pervasive, and disrupts production schedules and quality at a high cost.

Good Earth Tools has utilized more than 50 years of experience in designing, engineering, and manufacturing wear-proofed components to extend part life and performance in the oil sand industry. For example, our Tungsten Carbide fans last about 10 times longer than original fans, and our Tungsten Carbide-protected hammers show more than 80% increase in part life.

Good Earth Tools makes Tungsten Carbide-protected parts in the USA for the processing of oil sand, including separator distributors, exhauster fans, mill and fan housing liners, pulverizing hammers, auger screws, slurry pumps, and more. Good Earth Tools' Carbide-protected parts are designed to fight wear, run longer, and perform better, delivering constant long-term quality product.

Separator distributors wear out quickly at oil sand processing facilities.

GET Tungsten Carbide protects the inner distributor and the outer distributor where it's needed most.

“Our Tungsten Carbide fans last about 10 times longer than the original fans”

GET Tungsten Carbide-protected fans are much more abrasion-resistant and resilient to environmental conditions.

GET suction pump plate liners increase the life of the pump plate from four months to more than three years.

GET TigerCarb (left) and solid Tungsten Carbide hammers (right) maintain grind quality much longer than the original hammer.

Features and Benefits

F: GET Carbide is one of the most abrasion-resistant materials available.

B: Longer life from Carbide means less downtime, lower operating costs, and more production!

F: All GET Tungsten Carbide is silver-solder induction brazed to a steel body.

B: The braze is reliable, temperature-resistant, and very strong, over 30,000 lb/in strength.

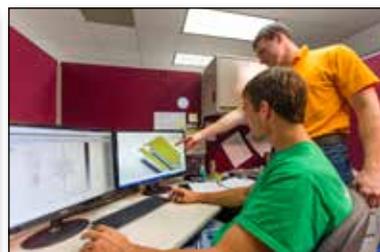

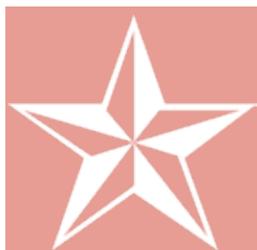

F: GET offers both industry standard and custom solutions for your wear problems.

B: GET will protect only what needs protected, minimizing weight, cost, and waste.

F: GET has more than 50 years of experience with wear products.

B: Our in-depth product knowledge assists you in your wear product needs. GET is your wear-protection expert!

**The Highly Skilled
Good Earth Tools
Dedicated Team
Makes the Difference!**

For 50+ years, Good Earth Tools has solved the world's toughest wear problems: mining, mixing, material handling, sizing, crushing, blending, and separating. Challenge us to improve your operations with innovative solid Tungsten Carbide wear technology.

Tough problems? Tough Solutions!
Good Earth Tools Works for You!
